Rollout

Distribute Claritalk Connect via Microsoft Intune

Here's how to push Claritalk Connect as a line-of-business app to the right user groups in your organization.

Adding the app in Intune

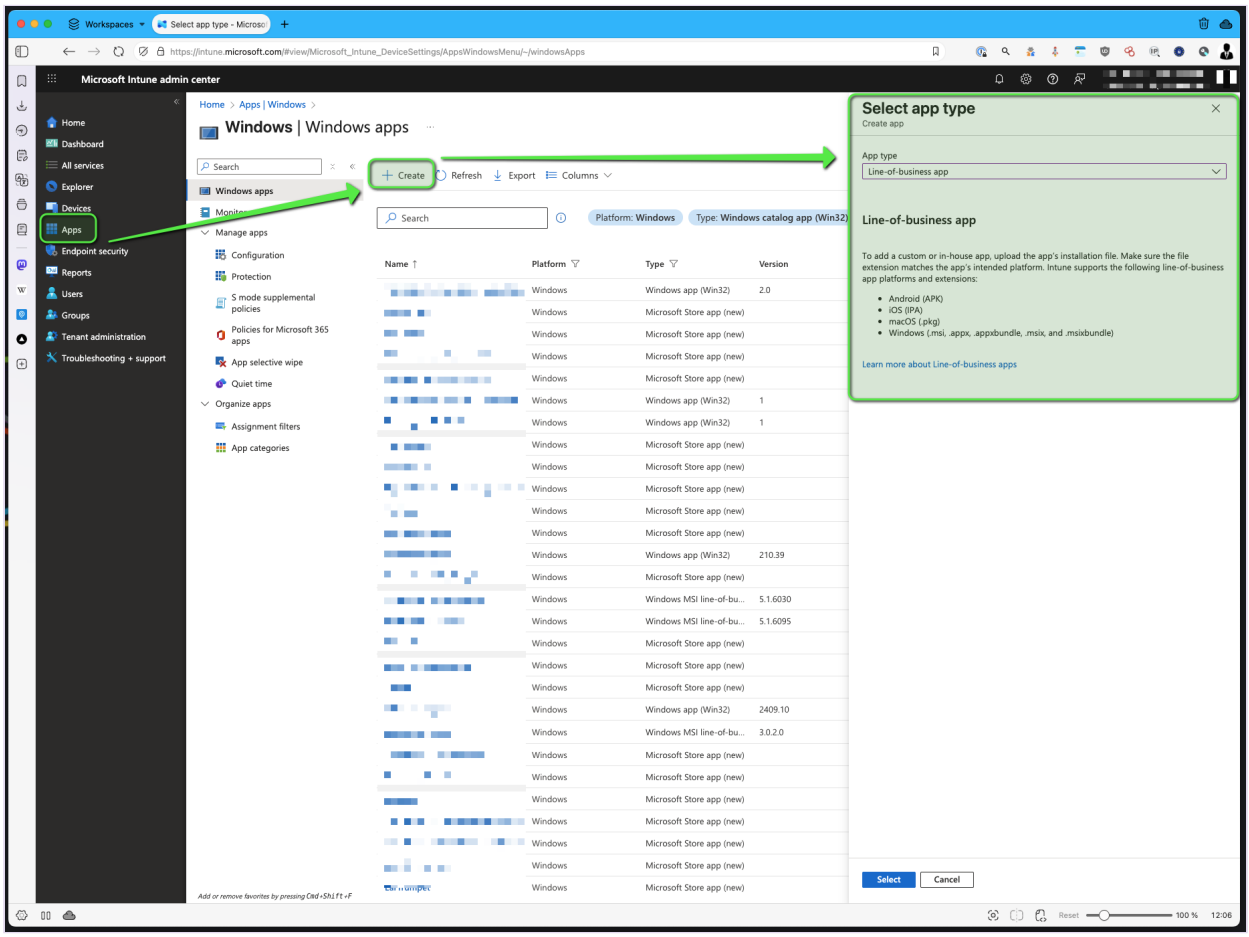

1. **Download the latest msi version**

   Get the latest .msi of Claritalk Connect from the public repo.

2. **Create a new app**

   Go to Intune/Endpoint and then to **Apps**.

   Apps › New › Line-of-business app

Creating a new line-of-business app

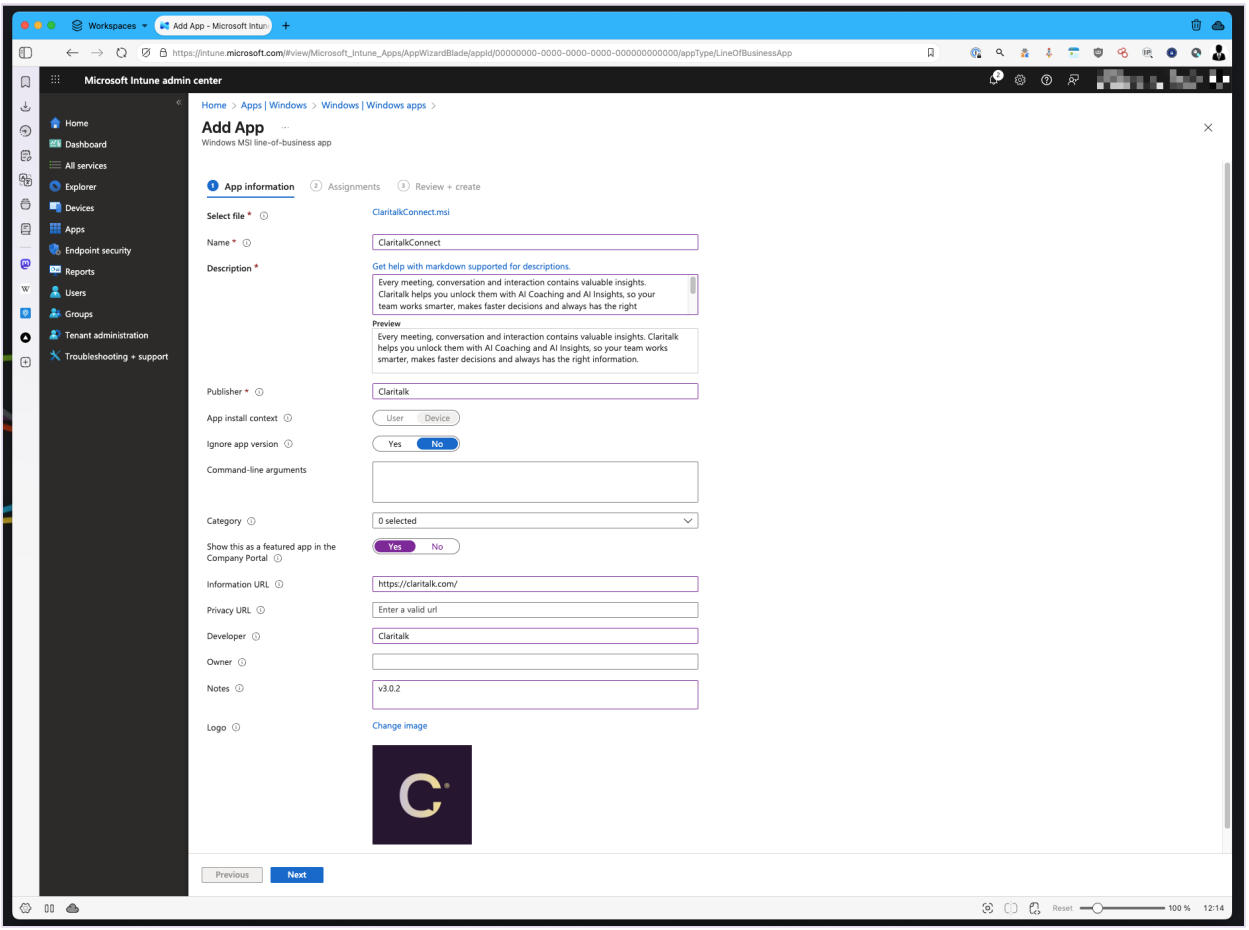

3. Upload the app

Uploading the msi

4. Fill in the information

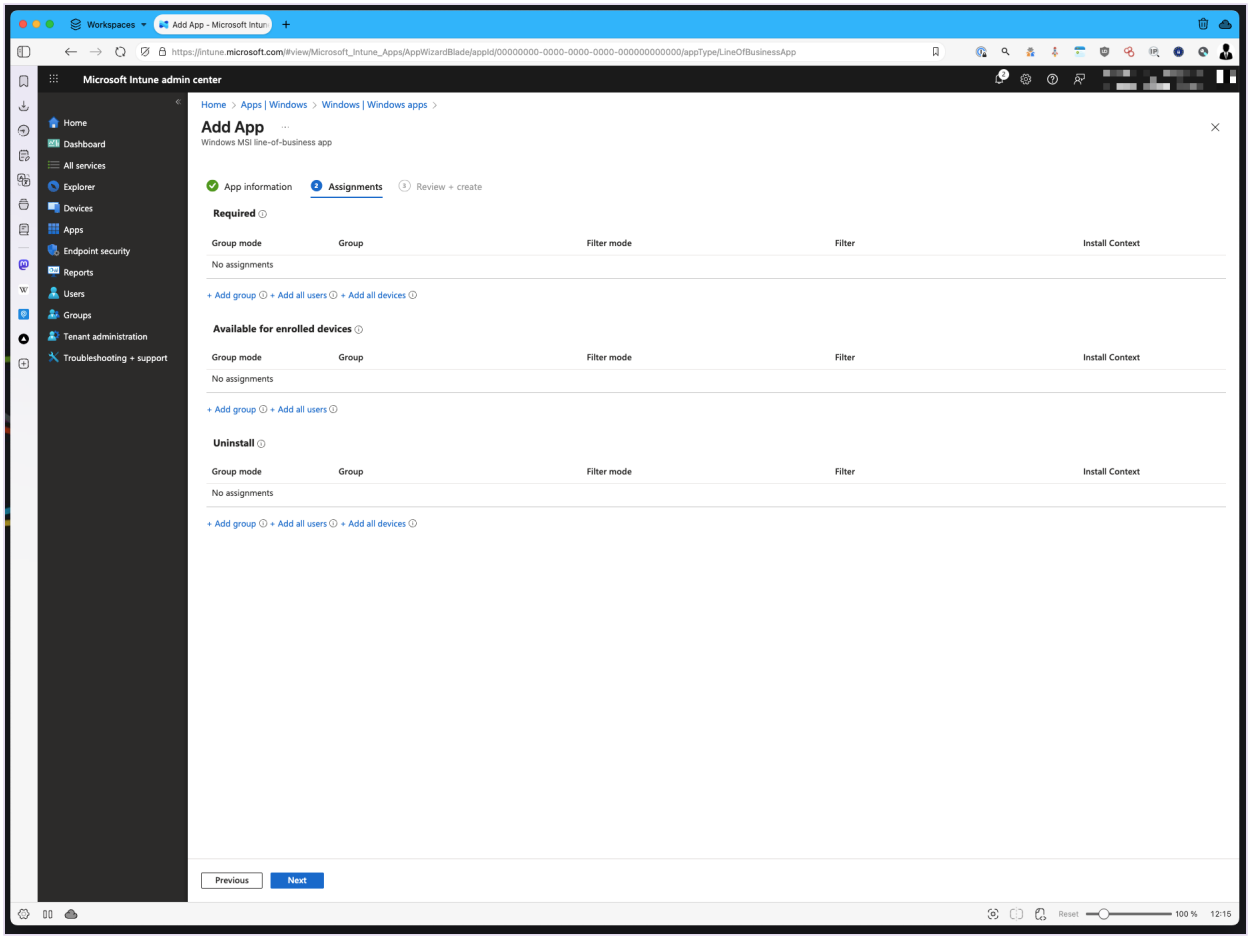

Upload the logo and add the category.

Entering app information and category

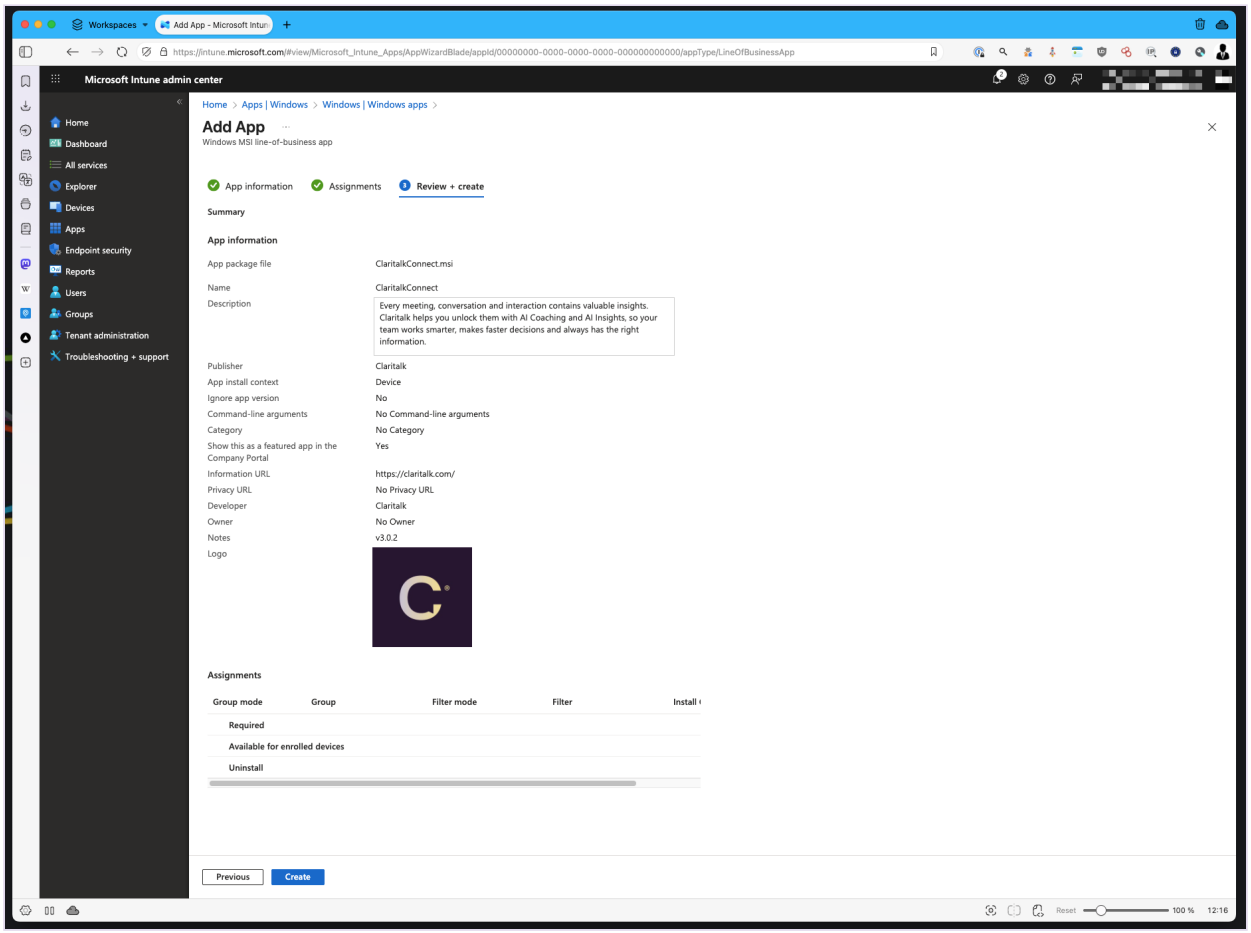

5. **Select the groups**

   Select the groups to whom you want to push the app.

Selecting target groups

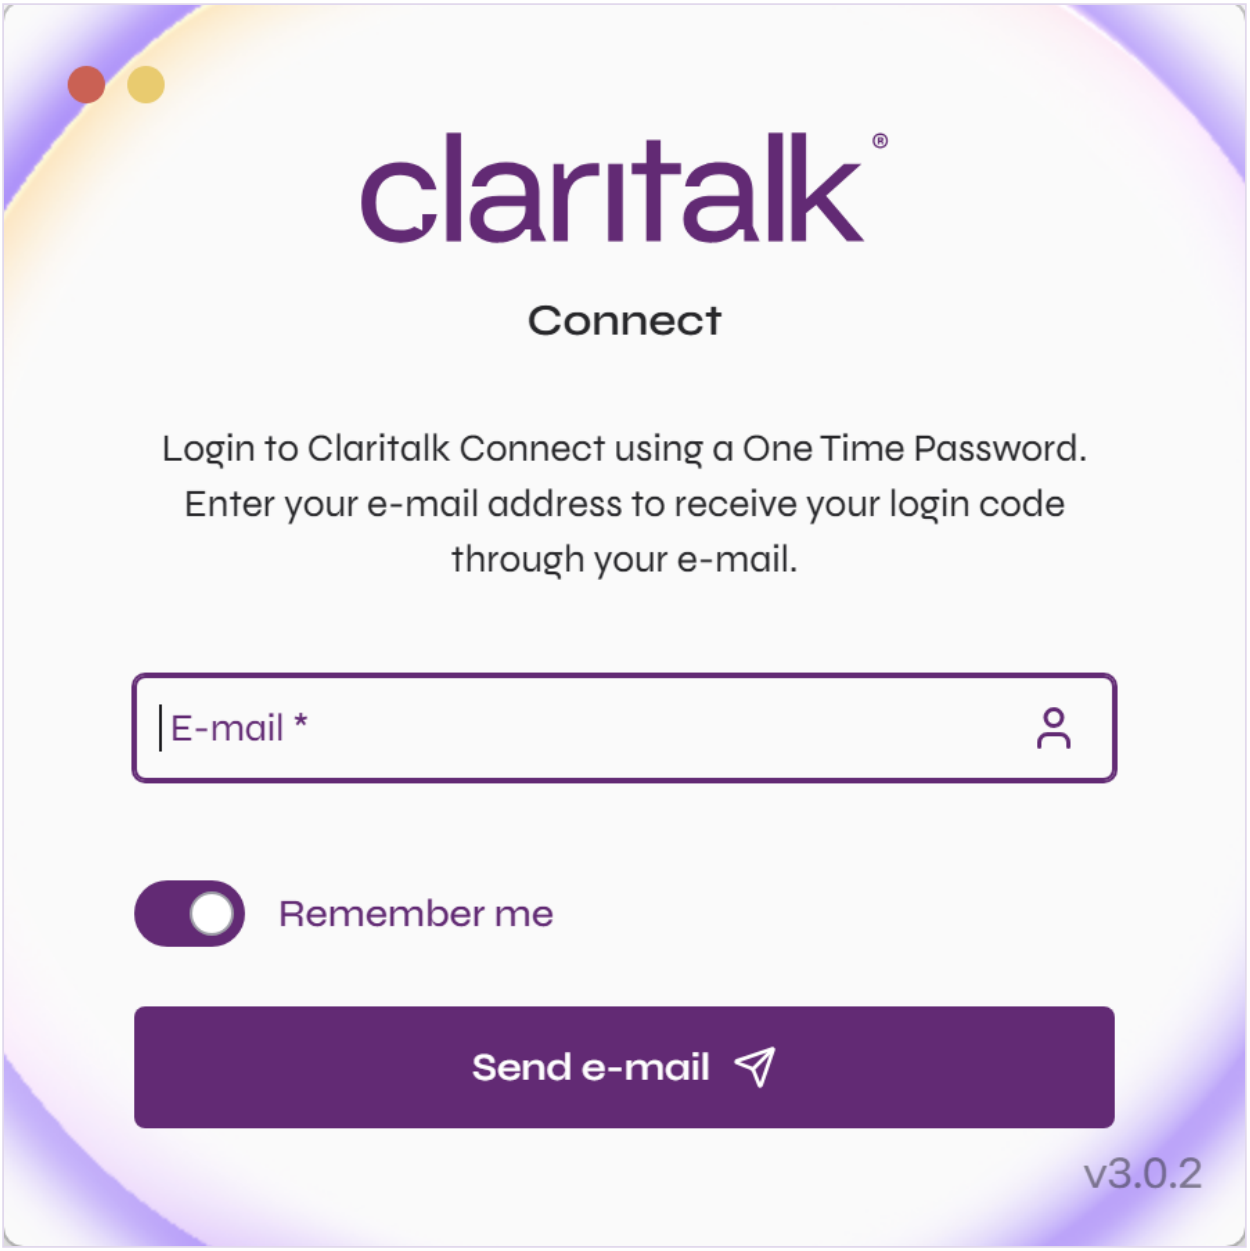

6. **Et voilà**

Claritalk Connect appears for users

After installation

Each user enters his email address in Claritalk Connect **once** and receives a code by email.

One-time login with email address and code

After entering the code, the user is authenticated and Claritalk Connect handles transcription when starting a meeting from app.claritalk.com or your internally connected systems.

Claritalk Connect is ready to use

Ready

Happy Clari-talkin'! *(Text thanks to a dedicated user.)*
